### **EDUCATION**

# Seoul National University'23

Seoul, Korea

Bachelor of Computer Science - Computer Science and Engineering; GPA: 3.9/4.3

Mar 2017 - Present

Courses: Computer Architecture, Data Structures, Algorithms, Artificial Intelligence, Internet Security and Privacy, Databases

University of Washington

Seattle, US

Exchange Student; GPA: 3.87/4.0

Mar 2022 - Present

Courses: Machine Learning, Software Design & Implementation, Introduction to Data Science

### SKILLS SUMMARY

Python, C, C++, Java, JavaScript, SQL, Bash, HTML, CSS • Languages:

Frameworks: Django, Spring, React

• Tools: Kubernetes, Docker, Git, MySQL, MongoDB, SQLite, Firebase, NodeJS, Tableau

• Platforms: Linux, Windows, AWS(EC2, RDS, S3, EB)

• Soft Skills: Leadership, Event Management, Time Management

#### EXPERIENCES

# SAP Labs Korea

Intern (Full-time)

June 2021 - Aug 2021

- o Developed cloud-native data lake solution: Based on Spark, Kubernetes (K8S), AWS S3 and other open source projects(Apache Hadoop, Apache Iceberg).
- Developed REST interface for Spark: By deploying Apache Livy on K8S, added another endpoint.
- o Managed K8S cluster with a helm chart: Built a helm chart to manage K8S deployments and services of multiple namespaces

# Diligentist, Inc.

Co-founder, Backend developmer

Mar 2021 - Feb 2022

Created a private mentoring platform to address problems in Korea's education market regarding structural imbalance.

- o Developed a web server using Django: Developed RESTful APIs using Django rest framework and made sign-in system using JWT
- o Designed and managed the deployment system: Adapted Docker multi-container to deploy the service on AWS Elastic Beanstalk.
- Enhanced the decision-making process of the developing team: By adopting a daily scrum meeting and a kanban board.
- Performances: Gathered 600+ users and raised \$40K funding from the Korea government agency
- SNU Tomorrow's Edge Membership(STEM, engineering student honor society) May 2021 - Feb 2022
  - Led the event by participating as a host in "Vision Mentoring", a career mentoring for 50+ high school students.

# • SNU Likelion(Web Development Club)

Mar 2020 - June 2021

- o Lectured 15 weeks of web development training sessions using Django for non-major students.
- o Planned club events such as Hackathon and Ideathon actively.

# Projects

### STEM website renewal

(https://www.gongwoo.snu.ac.kr/)

Sept 2021 - Dec 2021

- o Migrated on-premise database to cloud
- o Managed the admin page for the maintenance

Tech: Spring, React, Vercel, Firebase, HTML, CSS, AWS EC2

### Community for SNU dorm residents

(https://domitori.herokuapp.com/)

June 2020 - July 2020

- Developed comment writing function using asynchronous processing of jQuery.
- o Designed the structure of the database that uses SQLite.
- o Implemented multiple social logins using Oauth2.0 in order to provide easy and secure access to the service.

Tech: Django, SQlite, Jquery, HTML, CSS, Heroku
